
BUSINESS OUTCOME

A booking is a promise. A verified SPA is a conversion.

- 01 A stalled booking needs a next action.
- 02 A named person takes it.
- 03 Confirmed evidence shows what changed.

AGENDA

Business → workflow → proof → adoption

- 01 Chin Hin context and evidence
- 02 Before, solution logic and live workflow
- 03 Forecast, impact and a twelve-week pilot

OFFICIAL EVIDENCE + INTERPRETATION

Fit the business. Respect its existing systems.

- 01 Chin Hin Group and CHGP are different reporting scopes.
- 02 CHGP FY2025: RM976.7m revenue; RM2.18bn unbilled sales.
- 03 July 2026: Kingdee ERP transformation announced.
- 04 Unsigned bookings, unbilled sales and cash are distinct.

SURVEY EVIDENCE · N = 8

Prioritise with evidence. Validate on company records.

- 01 7 of 8: financing named the biggest leakage cause.
- 02 5 of 8: cases stall at bank credit assessment.
- 03 7 of 8: earlier eligibility checking preferred.
- 04 Mixed roles, convenience sample; no company cause-share estimate.

CHALLENGE WORKFLOW · TO VALIDATE

Before: the update has no closed loop.

- 01 Booking → buyer / banker message
- 02 Requirement → unclear next responsibility
- 03 Follow-up → scattered notes
- 04 Management → conversion still uncertain

OUR SOLUTION LOGIC

Every blocker leads to a responsible next move.

- 01 Evidence → confirmed case state
- 02 Blocker → action → owner → due date
- 03 Reply → human verification → changed case
- 04 Separate loan applications and legal milestones

WORKING PROTOTYPE · SYNTHETIC

Make the demo boundaries visible.

- 01 Open Settings as Project Manager.
- 02 Show Simulated Data, seed and reference date.
- 03 Switch to Nurul Aina · Sales Admin.
- 04 Demo profiles are not production SSO.

Open prototype /settings ↗

LIVE DEMONSTRATION

Today: a blocker becomes assigned work.

- 01 Find BK-9001 · A-12-03 · Raymond Tan.
- 02 Banker default; missing-document alternative.
- 03 Show the task owner and due date.
- 04 Open Quick View, then the full case.

Open prototype /chase ↗

CRITICAL WORKING WORKFLOW

Message → confirmation → visible state change.

- 01 Review the banker's payslip request.
- 02 Confirm → missing document becomes evidence.
- 03 Paste buyer reply; verify simulated receipt.
- 04 Confirm → payslip clears; bank decision remains.

Open prototype </bookings/BK-9001> ↗

DEMONSTRATED OPERATIONAL CHANGE

Before and after: what actually changed?

- 01 Before: generic bank wait; document proposal unconfirmed.
- 02 After review: specific document blocker and action.
- 03 After receipt: document cleared; bank still responsible.
- 04 An audit trail remains for the next administrator.

DEPARTMENT HANDOFF

Legal: approval still needs execution.

- 01 Switch to Arvind Raj · Legal Admin.
- 02 BK-9006: approved loan, no appointment.
- 03 Record Appointment opens the relevant action.
- 04 Verified signing—not scheduling—counts as conversion.

[Open prototype /legal ↗](#)

MANAGEMENT INTERVENTION

A follow-up reaches a named internal owner.

- 01 Switch to Project Manager · Manager.
- 02 Suggestions → Why This Case.
- 03 Request Follow-Up From the responsible person.
- 04 Open their Today desk and show assigned work.

Open prototype [/manager ↗](#)

STATISTICAL ESTIMATE · SYNTHETIC

Forecast signings with an explicit horizon and limits.

- 01 Target: within 30 days of the original booking.
- 02 Comparable stage + age → probability.
- 03 Show sample sizes, range and backtest.
- 04 Company calibration and held-out validation remain.

[Open prototype /forecast ↗](#)

TECHNOLOGY SECOND

Keep the workflow explainable and usable without a live model.

- 01 React desks · Bun API · PostgreSQL evidence record
- 02 Shared TypeScript rules for case state and forecast
- 03 Jev: structured proposals; Ask MortarAI: staff questions
- 04 Human review, labelled fallbacks and manual updates

ILLUSTRATIVE ASSUMPTIONS · NOT ACHIEVED

$$40 \times (40\% - 20\%) = 8 \text{ additional SPAs}$$

- 01 Assume 40 eligible stalled cases.
- 02 Assume 20% ordinary vs 40% assisted conversion.
- 03 Five-point uplift $\rightarrow$ 2; zero uplift $\rightarrow$ 0.
- 04 Within a 100-booking cohort, +8 means +8 points.

PROPOSED ADOPTION

One project. One daily owner. A twelve-week evaluation.

- 01 Weeks 1–2: approved exports, reconciliation, baseline.
- 02 Weeks 3–4: daily queue and verified responses.
- 03 Enroll days 15–44; comparable ordinary follow-up.
- 04 Observe by day 74; Legal reconciles by day 84.

[Open prototype /import ↗](#)

BUILT / PROPOSED / UNPROVEN

Show the maturity honestly.

- 01 Built: case, tasks, review, legal, manager and forecast.
- 02 Proposed: production identity and approved integration.
- 03 Not built: automatic WhatsApp and document OCR.
- 04 Unproven: additional company SPAs, savings or cash uplift.

CONCRETE NEXT DECISION

Agree the owner, the evidence and the comparison.

- 01 One suitable project and one administrator
- 02 Approved booking and executed-SPA evidence
- 03 Twelve-week pilot with an ordinary-follow-up comparison
